

Health Care Fraud Detection and Prevention (part Ii)

## Why the Global Market is Paying a Premium for This Skill Set

---

Source: McKinsey Global Institute, World Economic Forum, OECD (2026)

Trend Driver | Why It Matters | Global Source

Aging population and increased health care spending | As the global population ages, health care spending is increasing, making fraud detection and prevention a critical concern for governments and health care providers | World Economic Forum

Digitalization of health care services | The shift to digital health care services has created new opportunities for fraud, making it essential for health care providers to have robust fraud detection and prevention systems in place | McKinsey Global Institute

Global health care reform and regulatory compliance | Health care reform and regulatory compliance are driving the need for skilled professionals who can detect and prevent fraud, ensuring that health care providers are meeting regulatory requirements and maintaining patient trust | OECD
