
Low-Code Solutions

Why the Global Market is Paying a Premium for This Skill Set

Source: McKinsey Global Institute, World Economic Forum, OECD (2026)

Trend Driver | Why It Matters | Global Source

Rapid digital transformation across industries | Low-code enables 50–70% faster application delivery, directly impacting revenue velocity and cost reduction | McKinsey Global Institute

Accelerated automation of business processes | Companies automating workflows using low-code see 40% reduction in operational bottlenecks and 35% higher process efficiency | World Economic Forum

Severe global talent supply-demand imbalance | Low-code roles remain unfilled for an average of 4.2 months, creating a premium wage environment and career acceleration opportunities | OECD Skills Outlook

Emergence of citizen developers in enterprise ecosystems | Non-technical employees building solutions drive innovation velocity and reduce IT backlog by up to 30% | LinkedIn Economic Graph
